Greetings!Dr.satish,

At Opto Diode to digitize our existing component PDF drawings into CAD files for our website and other digital platforms.

I am sharing three sample PDF drawings for your review and example work you can share for internal review. Could you please provide a quote for converting similar drawings at two levels: 50 PDFs and 100 PDFs?

At minimum, we are looking for:

STEP / STP files

SolidWorks files, if feasible

2D engineering prints

Please also advise if you can support other useful formats such as IGES, DXF, DWG, STL, and PDF drawing output for customer downloads and CAD-platform use.

Please include pricing, lead time, included formats, and any assumptions based on drawing complexity.

Regards,

Sundar
